RE: AQD #17 Compliance Stack Test Results

Dear Dan:

Compliance stack testing for NO_x was conducted on AQD #17 (A and B Calciners) on May 17, 2002, as required per Operating Permit 30-126 Condition (F10) (a). The testing was conducted by Evergreen Air Services Inc., with results detailed in the enclosed report, M02-066-02.

EPA Reference Methods 1-4 and 7E were utilized for the testing, at a feed rate of 286 tph. Test results were 22.6 pph NO_x, which shows compliance with the permit limit of 30 pph NO_x.

If you have any questions concerning the testing or report, feel free to contact me at (307) 872-6571.

Respectfully submitted,

Dolly A. Potter
Environmental Services Supervisor
